

2022 RUN WHAT YOU BRUNG ENDURO

1. ELIGIBLE VEHICLES
 - a. ANYTHING that has 4 wheels.
 - b. Must comply with the rules for the class it originally was built for, i.e. cruiser, derby, stock, modified, bump and run, etc.
 - c. Must have a 6 point roll cage.
 - d. ALL glass must be removed.
 - e. All cars must have a number located on both doors, roof and back panel of trunk. **Numbers must be in a contrasting color from the body and at least 18 inches tall and 2 inches wide on doors and roof. Numbers must also be clean and readable. If it is determined that they are not visible to the scoring staff, you will NOT be scored. DO NOT put dark number on a dark car. If you must be told more than once you will be disqualified.**
2. INTERIOR
 - a. Metal racing seat required. Back of driver's seat must be attached to the roll bar.
 - b. All stock seat(s) must be removed.
 - c. No gutting allowed except for roll/door bar clearance. All flammable material, radio and air bags must be removed. Front and rear firewalls must remain and have no holes. Interior must remain open.
 - d. Interior cloth, carpet and vinyl must be removed.
 - e. Must have at least 3 windshield bars in front of driver.
3. ENGINES
 - a. Must comply with original class rules, i.e. cruiser, derby, stock, modified, bump and run, etc.
4. FUEL SYSTEMS
 - a. Stock fuel tanks permitted based on original class. Racing fuel cells optional.
 - b. If fuel tank is in front of the rear axle, it must be removed and placed behind the rear axle on rear wheel drive cars.
 - c. Use of a marine fuel tank in the trunk is permitted and MUST be securely attached.
 - d. Minor cutting of the trunk floor to necessitate moving the fuel tank is permitted.
5. TIRES AND WHEELS
 - a. DOT tires and wheels ONLY, must be OEM steel or aluminum wheels with standard bead bump and tires are a maximum of seven inches in width.
 - b. Racing tires only allowed on actual race cars, i.e., stock car, modified, etc.
6. ROLL BARS
 - a. A full 6-point roll cage is required. **If your welds look like bird shit, plan on finding someone who can actually weld. This is a safety issue.**
 - b. MUST use steel pipe or tubing of 1 1/2" outside diameter minimum and .095" wall thickness minimum.
 - c. Must be mounted to the frame or on steel plates that are welded or bolted to the floor boards.
 - d. Three horizontal door bars on driver side and two horizontal door bars on passenger side. Both sides must have vertical bracing from top to bottom door bars.
 - e. Roll bar padding mandatory near drivers head and anywhere within arm's reach.
 - f. Front and rear hoops optional.
7. SAFETY EQUIPMENT
 - a. All cars must have a chain securely fastened at the front and back bumper to be safely towed off the track.
 - b. Fire extinguisher must be mounted in car within arm's reach of driver.
 - c. 5-point harness (seat belts) required and must be mounted with grade 8 bolts.
 - d. Window net required.
 - e. Racing helmet required of at least SA2010 rating. No motorcycle helmets.
 - f. Racing suit, gloves and shoes preferred. If no race suit, clothing must be fire retardant and include shirt/jacket, pants, coveralls, gloves and shoes (must be leather, excluding steel toed).
